

QUICK REVIEW

Quick Review: Phase Changes and Latent Heat

Refresh the most important ideas, formulas, and problem-solving strategies for phase changes and latent heat in just a few minutes.

 TIME 5–10 minutes	 BEST FOR A rapid refresh	 FINISH WITH Key ideas refreshed

After this quick review, you'll be able to...

quickly recall the essential concepts, formulas, and problem-solving strategies needed to move forward with confidence.

HOW TO USE THIS GUIDE

Work through the four stages in order. Write directly in the spaces provided, check your work in the Quick Answers section, and finish by choosing the next resource that matches your confidence.

Choose how you want to review: work through this guide, follow the online review, or watch the video review.

Course Alignment

This Physics Sensei Unit Review is an independent learning resource. Use it to reinforce key concepts, prepare for homework, or review before a quiz or exam.

RESOURCE: Physics Sensei Unit Review
UNIT ID: THM-U04
TOPIC: Phase Changes and Latent Heat
COURSE LEVEL: Algebra-based introductory physics

BEST USED

- ✓ After learning the unit
- ✓ Before starting homework
- ✓ Before a quiz or exam

FR-03 • YOUR REVIEW PLAN

Your Review Plan

Complete these four stages to quickly refresh the essential ideas and confirm you're ready to continue.

4 stages • Approximately 5–10 minutes

1 Quick Recall Refresh what you already know.	2 Essential Idea Review the most important concept.
3 Confidence Check Confirm you're ready to move on.	4 Next Step Continue your learning.

PRINTING TIP

For student copies, print double-sided and keep the Quick Answers section after the student activities so learners attempt each activity before checking their work.

FR-04 • STAGE 1 OF 4

Quick Recall

Let's quickly refresh what you already know. This short recall activity will bring the most important ideas back to mind before you review them.

QUICK RECALL

Recall Activity

Recall how to choose between sensible heat and latent heat.

Fill in the models: temperature change within one phase $\rightarrow Q = \underline{\hspace{1cm}}$; phase change at the transition temperature $\rightarrow Q = \underline{\hspace{1cm}}$.

Ready to refresh the essentials?

Great! Now review the most important idea you'll want to remember.

Essential Idea

Take one last look at the most important concept from this topic. If you remember this idea, the rest will come back much more easily.

ESSENTIAL IDEA**Latent Heat During a Phase Change**

During a phase change, temperature can remain nearly constant while energy is transferred. Use $Q = mL$, with L_f for solid↔liquid and L_v for liquid↔gas. Melting and vaporization absorb energy; freezing and condensation release it.

$$Q = mL$$

EXAMPLE 0.20 kg of ice melting with $L_f = 334 \text{ kJ/kg}$ requires $Q = 66.8 \text{ kJ}$.

SENSEI NOTE Do not include ΔT in the phase-change stage.

Ready to check your memory?

You've refreshed the essential idea. Now see how much you remember before moving on.

FR-06 • STAGE 3 OF 4

Confidence Check

You've refreshed the essential idea. Now answer this quick confidence check to confirm you're ready to move on.

CONFIDENCE CHECK

Equation Choice

Choose the correct latent heat and energy direction.

Water condenses from vapor to liquid. Which latent heat is used, and does the sample gain or lose energy?

Ready for your next step?

Great work! You've refreshed the essential idea. Now choose the resource that best matches what you'd like to do next.

QUICK ANSWERS • CHECK AFTER ATTEMPTING

Quick Answers and Explanations

Use these concise answers to check your recall and confidence—not only your final response.

QUICK RECALL**Recall Activity**

$Q = mc\Delta T$ for temperature change; $Q = mL$ for a phase change.

WHY IT WORKS The equation must match the physical stage.

CONFIDENCE CHECK**CONFIDENCE CHECK****Equation Choice**

Use L_v ; the sample loses energy during condensation.

WHY IT WORKS Condensation is the reverse of vaporization, so the same latent-heat magnitude applies with opposite energy direction.

READINESS GUIDE

1 correct: You're ready to continue. • 0 correct: Revisit the Essential Idea or choose more practice.
